

APRIL DVM/VETERINARY SCIENCE SCHOLARSHIP AWARD

Aims and Context

The DVM/Veterinary Science Scholarship program of the Australasian Pork Research Institute Ltd. (APRIL) provides an opportunity for high-quality students to engage with APRIL stakeholders, and the Australasian pork industry more broadly, by undertaking an independent research project in pig science (or related) as part of a program of study.

The awards can be used for preliminary investigations into new research ideas, or they can be used to conduct smaller scale experiments within currently funded APRIL projects.

Value

The amount of funding provided per project will be commensurate with the scope of the research project and the number of applications received from each academic institution. The size of each Award and the number of scholarships granted will be at the discretion of APRIL.

Eligibility

Who can apply?

Students who are studying a Doctor of Veterinary Medicine or Bachelor's Award in Veterinary Science on a full-time basis through an APRIL Participant University, which are:

- Murdoch University,
- The University of Queensland, and
- The University of Melbourne.

Guidelines

Research projects

- The project should align closely with one of APRIL's research priorities; however, consideration may be given for a related activity.
- The application must show that the project has clearly defined aims achievable within the scope of the program of study.
- Suitable resources must be available within the organisation(s) to support the completion of the project.

Supervision

- All supervisors must have a clear track record of student supervision and student completion.
- Before submitting their application, students should discuss their proposal with their intended supervisor/s.

Other requirements

- Scholarship holders may be asked to present a seminar at the end of their program, and (or) at an appropriate time, as determined by APRIL.
- All theses, presentations and papers arising from the research conducted as part of this scholarship must be received by, and given acknowledge to, the support of APRIL.

- By applying, and if successful, the student and academic organisation agrees to all requirements of the Scholarship contained in an Agreement, including submitting a report at the end of the Scholarship.

Criteria for assessment

- The student's academic record and *curriculum vitae*.
- The student's personal statement outlining the reasons for applying.
- The nominated supervisor/s capacity and availability to oversee the project.
- The student's proposed research and stated aims align with the overall research priorities and aims of APRIL.
- Resources are available to complete the project.
- The project is feasible within the timeframe and requirements of the relevant program of study.

Important dates

Applications open: 25 October 2024

Applications close: 24th January 2025 (or at a later date depending on the university's timetable)

How to apply

Application forms are available from the APRIL website (<https://apri.com.au/education-and-training-opportunities/>). Completed applications from supervisors should reach APRIL by the closing date, and the outcomes will be announced as soon as possible after the closing date. The APRIL Education Advisory Committee will assess all applications against APRIL-related criteria.

Applications should be lodged electronically to APRIL Executive Officer, Dr Charles Rikard-Bell c.rikardbell@april.org.au

Questions on the Awards should be directed to Dr Rikard-Bell at c.rikardbell@april.org.au
